# 1. Introduction To Bootstrap

- Powerful front end framework
- Based on Html , CSS , Javascript
- Based on Responsive design
- Open source
- Cross Browser support

Responsive web design is about creating websites which automatically adjust themselves to look good on all device , from small phone to large desktop.

## 2. Why Bootstrap

- Fast development
- Cross browser support
- Number of devices support
- Easy to customize components
- Free
- Community support

# 3. Bootstrap CSS and JS

➤ Three things are needed

1. Bootstrap CSS in head
2. jQuery Javascript at the end of body
3. Bootstrap Javascript at the end of body

## 4. Grid System

- Bootstrap's grid system allow up to 12 columns across the page.
- If you don't want to use all 12 columns individually, you can group the columns together to create wider column.

Span 1	Span 1	Span 1	Span 1	Span 1	Span 1	Span 1	Span 1	Span 1	Span 1	Span 1	Span 1
Span 4				Span 4				Span 4			
Span 4				Span 8							
Span 6						Span 6					
Span 12											

# 5. Grid Options

	Extra small devices Phones (<768px)	Small devices Tablets (≥768px)	Medium devices Desktops (≥992px)	Large devices Desktops (≥1200px)
<b>Grid behavior</b>	Horizontal at all times	Collapsed to start, horizontal above breakpoints		
<b>Container width</b>	None (auto)	750px	970px	1170px
<b>Class prefix</b>	.col-xs-	.col-sm-	.col-md-	.col-lg-
<b># of columns</b>	12			
<b>Column width</b>	Auto	~62px	~81px	~97px
<b>Gutter Width</b>	30px (15px on each side of a column)			
<b>Nestable</b>	Yes			
<b>Offsets</b>	Yes			
<b>Column ordering</b>	Yes			

# 6. Grid Class

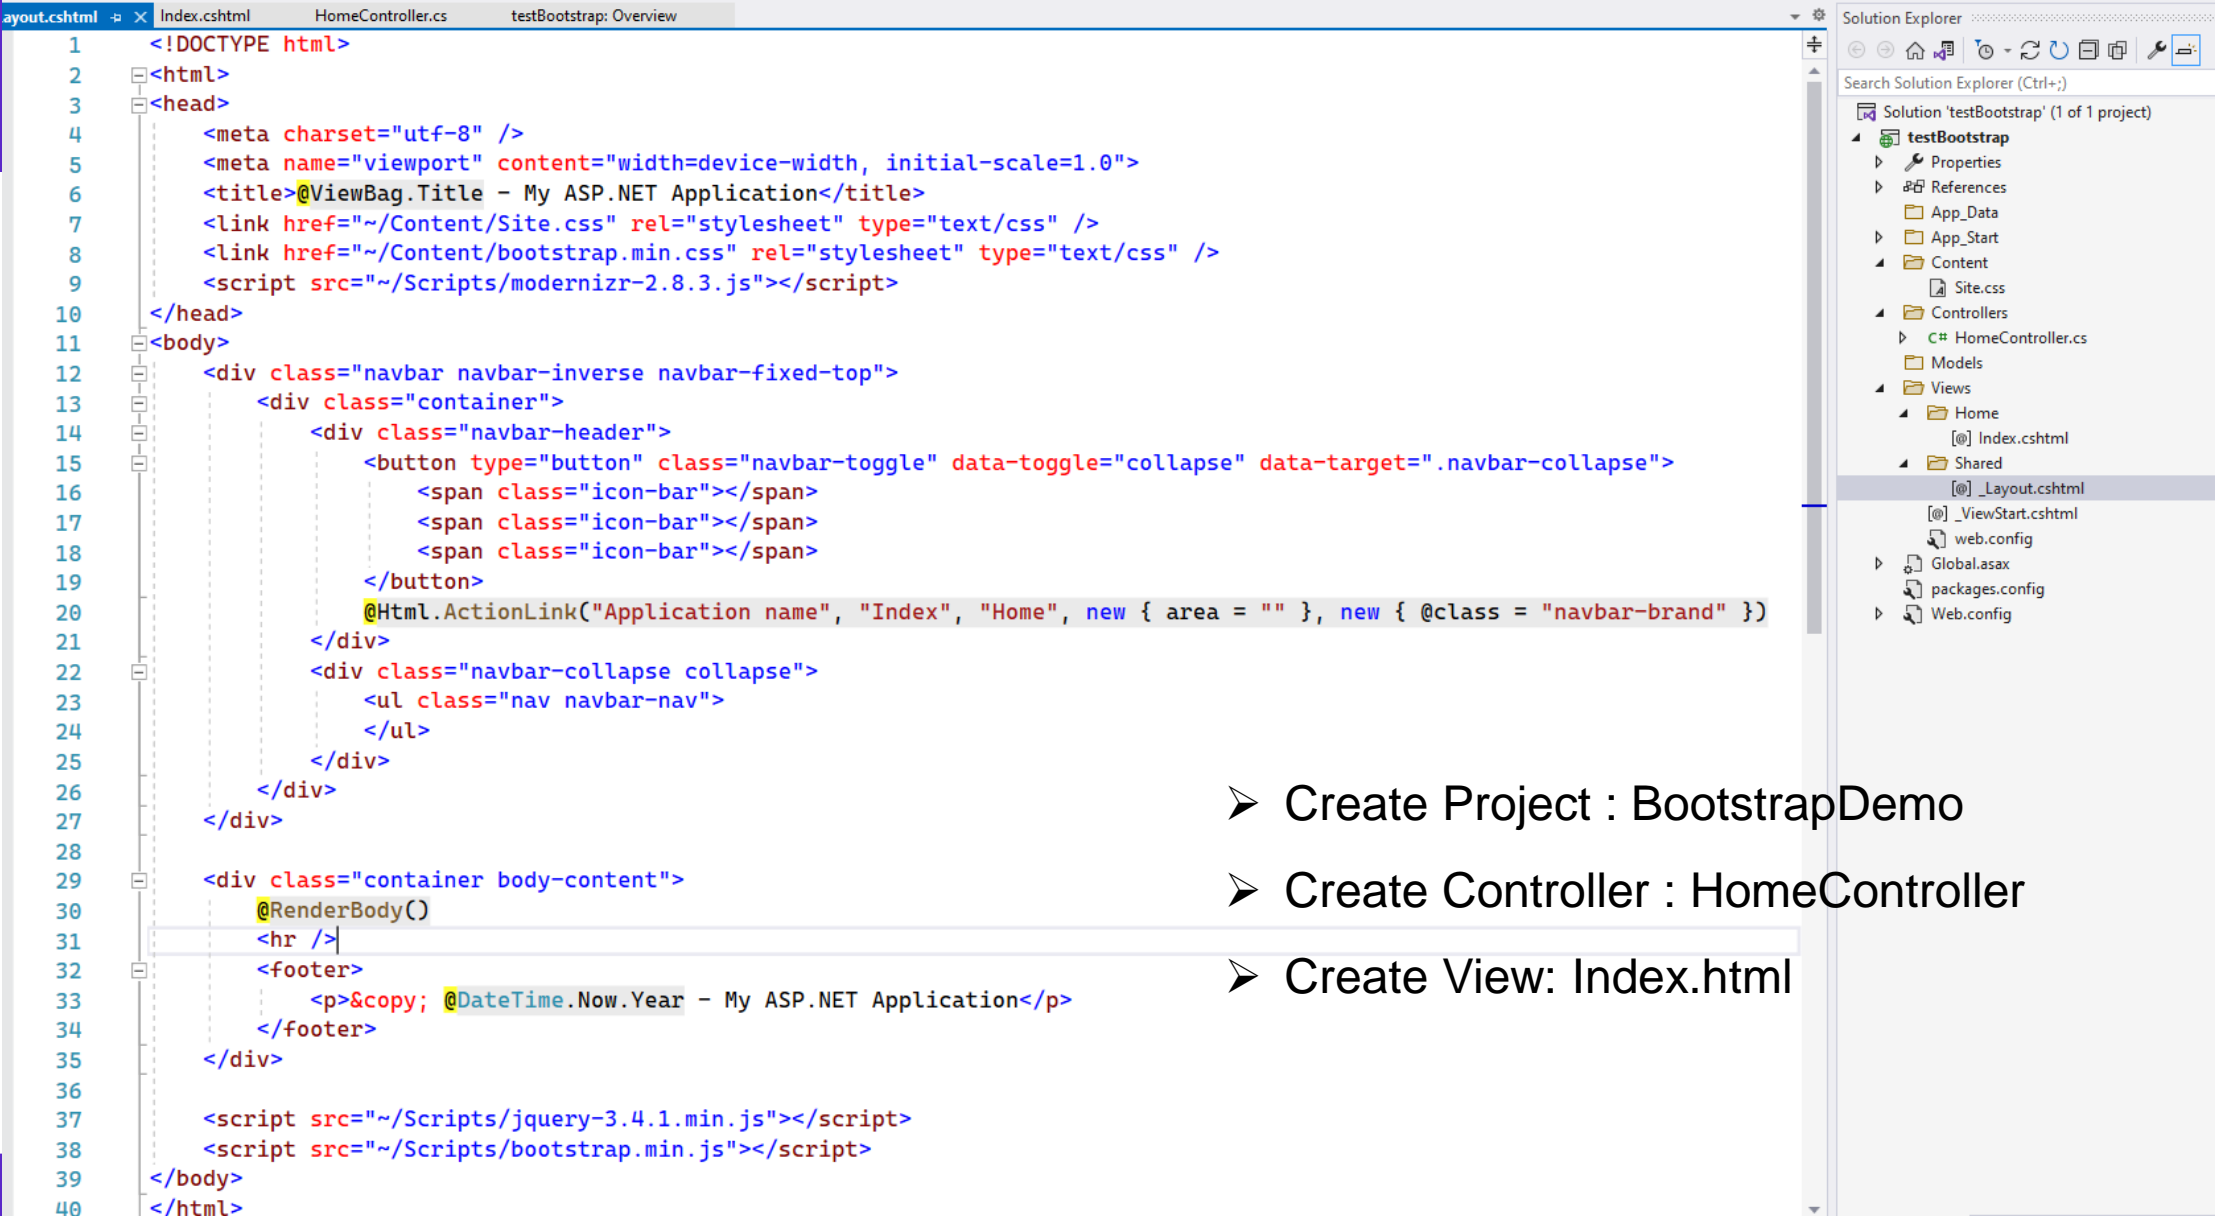

- ▶ xs (for phones)
- ▶ sm (for tablets)
- ▶ md (for desktops)
- ▶ lg (for larger desktops)

# 7. Grid System Rules

- Row must be placed within a `.container` (fixed-width) or `.container-fluid` (full-width) for proper alignment and padding.
- Use rows to create horizontal group of columns.
- Content should be placed within columns, and only columns may be immediate children of rows.
- Predefined class like `.row` and `.col-sm-4` are available for quickly making quick layout.

# 8. Practice

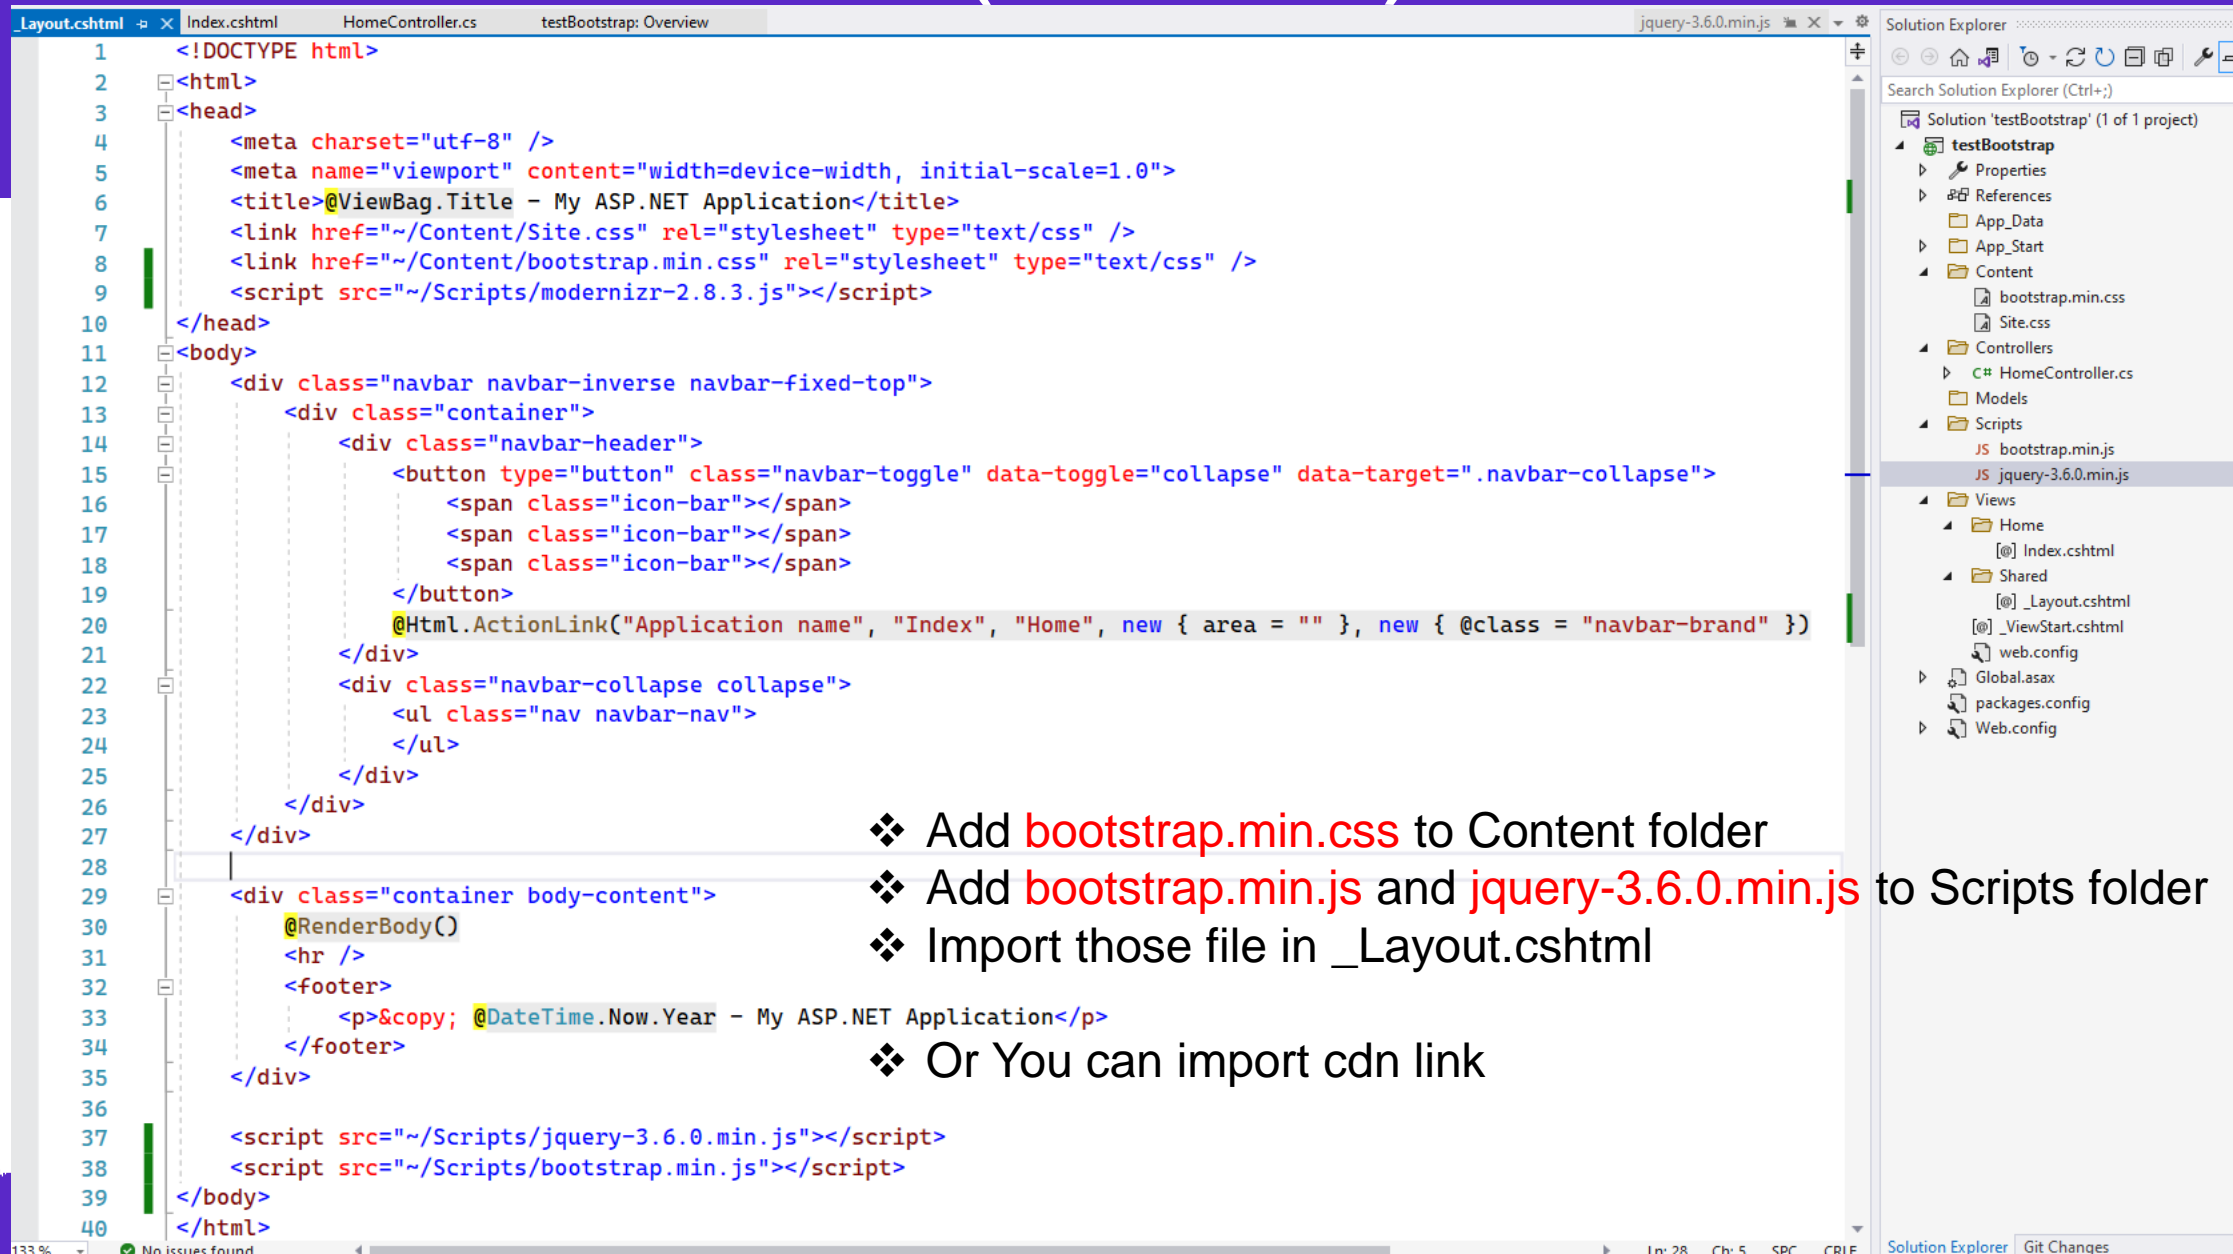

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4   <meta charset="utf-8" />
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>@ViewBag.Title - My ASP.NET Application</title>
7   <link href="~/Content/Site.css" rel="stylesheet" type="text/css" />
8   <link href="~/Content/bootstrap.min.css" rel="stylesheet" type="text/css" />
9   <script src="~/Scripts/modernizr-2.8.3.js"></script>
10 </head>
11 <body>
12   <div class="navbar navbar-inverse navbar-fixed-top">
13     <div class="container">
14       <div class="navbar-header">
15         <button type="button" class="navbar-toggle" data-toggle="collapse" data-target=".navbar-collapse">
16           <span class="icon-bar"></span>
17           <span class="icon-bar"></span>
18           <span class="icon-bar"></span>
19         </button>
20         @Html.ActionLink("Application name", "Index", "Home", new { area = "" }, new { @class = "navbar-brand" })
21       </div>
22       <div class="navbar-collapse collapse">
23         <ul class="nav navbar-nav">
24         </ul>
25       </div>
26     </div>
27   </div>
28
29   <div class="container body-content">
30     @RenderBody()
31     <hr />
32     <footer>
33       <p>&copy; @DateTime.Now.Year - My ASP.NET Application</p>
34     </footer>
35   </div>
36
37   <script src="~/Scripts/jquery-3.4.1.min.js"></script>
38   <script src="~/Scripts/bootstrap.min.js"></script>
39 </body>
40 </html>
```

Solution Explorer (Ctrl+;) shows the project structure for 'testBootstrap' (1 of 1 project):

- testBootstrap
  - Properties
  - References
  - App\_Data
  - App\_Start
  - Content
    - Site.css
  - Controllers
    - HomeController.cs
  - Models
  - Views
    - Home
      - Index.cshtml
    - Shared
      - \_Layout.cshtml
      - \_ViewStart.cshtml
  - web.config
  - Global.asax
  - packages.config
  - Web.config

- Create Project : BootstrapDemo
- Create Controller : HomeController
- Create View: Index.html

# 8. Practice (Cont..)

The screenshot displays the Visual Studio IDE with the following components:

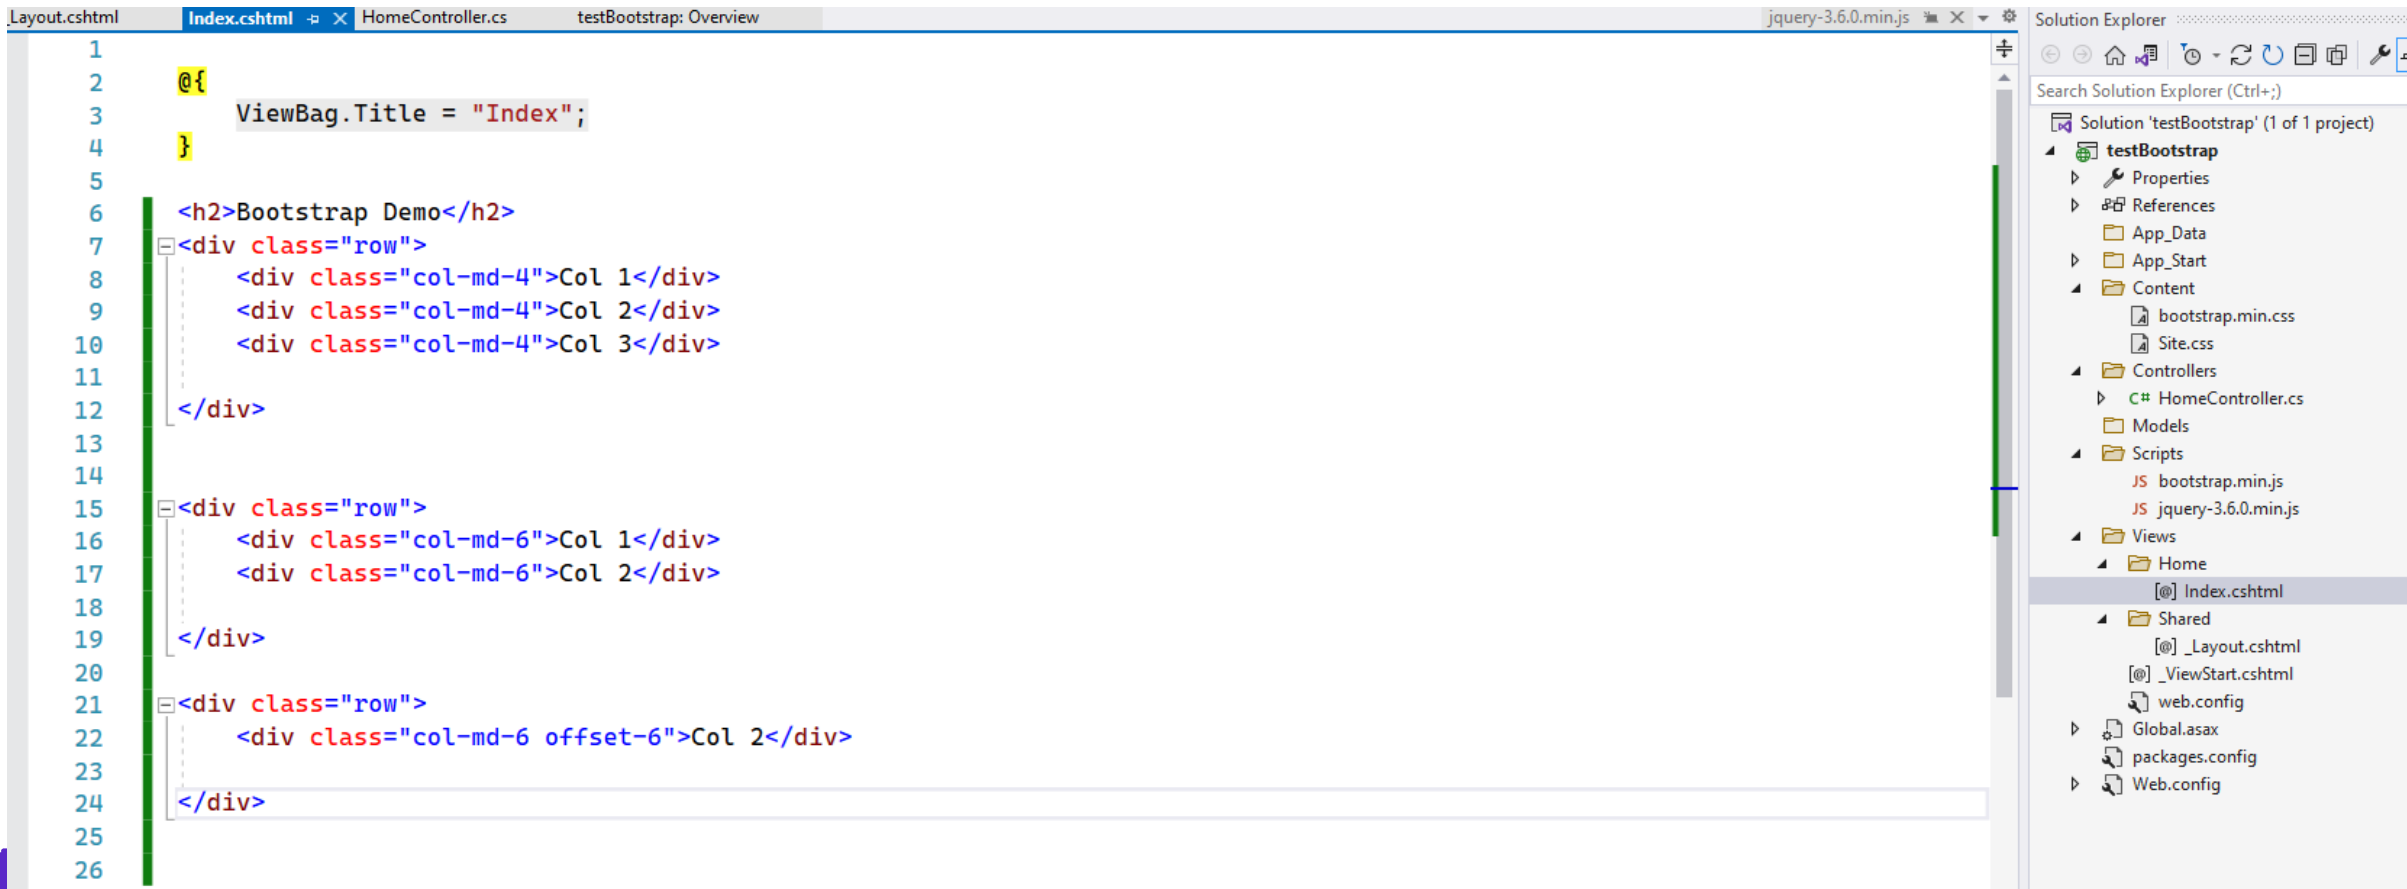

- Code Editor:** Shows the `_Layout.cshtml` file with the following content:

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4     <meta charset="utf-8" />
5     <meta name="viewport" content="width=device-width, initial-scale=1.0">
6     <title>@ViewBag.Title - My ASP.NET Application</title>
7     <link href="~/Content/Site.css" rel="stylesheet" type="text/css" />
8     <link href="~/Content/bootstrap.min.css" rel="stylesheet" type="text/css" />
9     <script src="~/Scripts/modernizr-2.8.3.js"></script>
10 </head>
11 <body>
12     <div class="navbar navbar-inverse navbar-fixed-top">
13         <div class="container">
14             <div class="navbar-header">
15                 <button type="button" class="navbar-toggle" data-toggle="collapse" data-target=".navbar-collapse">
16                     <span class="icon-bar"></span>
17                     <span class="icon-bar"></span>
18                     <span class="icon-bar"></span>
19                 </button>
20                 @Html.ActionLink("Application name", "Index", "Home", new { area = "" }, new { @class = "navbar-brand" })
21             </div>
22             <div class="navbar-collapse collapse">
23                 <ul class="nav navbar-nav">
24                 </ul>
25             </div>
26         </div>
27     </div>
28
29     <div class="container body-content">
30         @RenderBody()
31         <hr />
32         <footer>
33             <p>&copy; @DateTime.Now.Year - My ASP.NET Application</p>
34         </footer>
35     </div>
36
37     <script src="~/Scripts/jquery-3.6.0.min.js"></script>
38     <script src="~/Scripts/bootstrap.min.js"></script>
39 </body>
40 </html>
```
- Solution Explorer:** Shows the project structure for 'testBootstrap' (1 of 1 project). The 'Scripts' folder contains `bootstrap.min.js` and `jquery-3.6.0.min.js`. The 'Views' folder contains `Home`, `Shared`, and `_ViewStart.cshtml`.
- Annotations:** Four bullet points are overlaid on the right side of the code editor:
  - ❖ Add **bootstrap.min.css** to Content folder
  - ❖ Add **bootstrap.min.js** and **jquery-3.6.0.min.js** to Scripts folder
  - ❖ Import those file in `_Layout.cshtml`
  - ❖ Or You can import cdn link

# 8. Practice (Cont..)

## Index.cshtml

The screenshot displays the Visual Studio IDE with the following components:

- Editor Window:** Shows the `Index.cshtml` file with the following code:

```
1  @{
2
3      ViewBag.Title = "Index";
4  }
5
6  <h2>Bootstrap Demo</h2>
7  <div class="row">
8      <div class="col-md-4">Col 1</div>
9      <div class="col-md-4">Col 2</div>
10     <div class="col-md-4">Col 3</div>
11 </div>
12
13
14
15 <div class="row">
16     <div class="col-md-6">Col 1</div>
17     <div class="col-md-6">Col 2</div>
18 </div>
19
20
21 <div class="row">
22     <div class="col-md-6 offset-6">Col 2</div>
23 </div>
24
25
26
```
- Tab Bar:** Shows open files: `Layout.cshtml`, `Index.cshtml`, `HomeController.cs`, and `testBootstrap: Overview`. A `jquery-3.6.0.min.js` file is also visible in the background.
- Solution Explorer:** Displays the project structure for `testBootstrap`:
  - testBootstrap
    - Properties
    - References
    - App\_Data
    - App\_Start
    - Content
      - bootstrap.min.css
      - Site.css
    - Controllers
      - HomeController.cs
    - Models
    - Scripts
      - bootstrap.min.js
      - jquery-3.6.0.min.js
    - Views
      - Home
        - Index.cshtml
      - Shared
        - \_Layout.cshtml
        - \_ViewStart.cshtml
        - web.config
    - Global.asax
    - packages.config
    - Web.config

# 9. Bootstrap Form

- Bootstrap provides three type of form layouts
  1. Vertical form (default)
  2. Horizontal form
  3. Inline form
- Standard rules for all three form layouts:
  - Use grid system to make form
  - Add class **.form-control** to all textual **<input>** , **<textarea>**, and **<select>** elements

# 10. Bootstrap Input

➤ Bootstrap supports the following form control:

1. Input-text --Add class **.form-control**
2. textarea --Add class **.form-control**
3. Checkbox –wrap checkboxes in div and add class **.checkbox** to div
4. radio –wrap radio button in div and add class **.radio** to div
5. select --Add class **.form-control**

# 11. Bootstrap Buttons

➤ Bootstrap provides 7 style of buttons

1. `.btn-default`
2. `.btn-primary`
3. `.btn-success`
4. `.btn-info`
5. `.btn-warning`
6. `.btn-danger`
7. `.btn-link`

➤ Class that define different size are:

1. `.btn-lg`
2. `.btn-md`
3. `.btn-sm`
4. `.btn-xs`

# 12. Practice Form

## ❖ Vertical Form

The screenshot displays a Visual Studio code editor with a project named 'testBootstrap'. The active file is 'VerticalForm.cshtml', which contains the following code:

```
1  @{
2      ViewBag.Title = "VerticalForm";
3  }
4
5  <h2>Vertical Form</h2>
6  <hr />
7  <form>
8      <div>
9          <label>Enter Username</label>
10         <input type="text" class="form-control"/>
11     </div>
12     <div>
13         <label>Enter Password</label>
14         <input type="password" class="form-control"/>
15     </div>
16     <div>
17         <div class="checkbox">
18             <label><input type="checkbox" value="r"/>Remember Me</label>
19         </div>
20     </div>
21     <input type="submit" class="btn btn-primary" value="Login" />
22 </form>
23
24
25
```

The Solution Explorer on the right shows the project structure, including the 'Views' folder with the 'Home' subfolder containing 'Index.cshtml', 'InlineForm.cshtml', and 'VerticalForm.cshtml'.

# 12. Practice Form(Cont..)

## ❖ Inline Form

The screenshot displays a Visual Studio IDE with a C# project named 'testBootstrap'. The active file is 'InlineForm.cshtml', which contains the following code:

```
1  @{
2      ViewBag.Title = "InlineForm";
3  }
4
5
6  <h2>Inline Form</h2>
7  <form class="row g-3">
8      <div class="col-md-3">
9          <label>Enter Username</label>
10         <input type="text" class="form-control" />
11     </div>
12     <div class="col-md-3">
13         <label>Enter Password</label>
14         <input type="password" class="form-control" />
15     </div>
16     <div class="col-md-3">
17         <div class="checkbox">
18             <label><input type="checkbox" value="r" />Remember Me</label>
19         </div>
20     </div>
21     <div class="col-md-3">
22         <input type="submit" class="btn btn-primary" value="Login" />
23     </div>
24 </form>
25
26
```

The Solution Explorer on the right shows the project structure, including the 'Controllers' folder with 'HomeController.cs' and the 'Views' folder with 'Home' subfolder containing 'Index.cshtml', 'InlineForm.cshtml', and 'VerticalForm.cshtml'.

# 12. Practice Form(Cont..)

## ❖ Horizontal Form

```
HorizontalForm.cshtml  InlineForm.cshtml  VerticalForm.cshtml  _Layout.cshtml  Index.cshtml  HomeController.cs
1
2  @{
3      ViewBag.Title = "HorizontalForm";
4  }
5  <h2>Horizontal Form</h2>
6  <form>
7      <div class="row mb-2">
8          <label class="col-md-3" for="name">Enter Name</label>
9          <div class="col-md-9">
10             <input type="text" class="form-control" id="name" />
11          </div>
12      </div>
13      <div class="row mb-2">
14          <label class="col-md-3">Address</label>
15          <div class="col-md-9">
16             <textarea class="form-control"></textarea>
17          </div>
18      </div>
19      <div class="row mb-2">
20          <label class="col-md-3">Gender</label>
21          <div class="col-md-9">
22              <div class="form-check form-check-inline">
23                  <input type="radio" id="male" name="gender" value="m" />
24                  <label for="male">Male</label>
25              </div>
26              <div class="form-check form-check-inline">
27                  <input type="radio" id="female" name="gender" value="f" />
28                  <label for="female">Female</label>
29              </div>
30          </div>
31      </div>
```

```
33      <div class="row mb-2">
34          <label class="col-md-3">Language Known</label>
35          <div class="col-md-9">
36              <div class="form-check form-check-inline">
37                  <input type="checkbox" id="hindi" name="language" value="h" />
38                  <label for="hindi">Hindi</label>
39              </div>
40              <div class="form-check form-check-inline">
41                  <input type="checkbox" id="english" name="language" value="f" />
42                  <label for="english">English</label>
43              </div>
44              <div class="form-check form-check-inline">
45                  <input type="checkbox" id="khmer" name="language" value="k" />
46                  <label for="khmer">Khmer</label>
47              </div>
48          </div>
49      </div>
50  </div>
51  <div class="row mb-2">
52      <label class="col-md-3">Select City</label>
53      <div class="col-md-9">
54          <select class="form-control">
55              <option value="btb">Battambang</option>
56              <option value="pp">Phnom Penh</option>
57              <option value="sr">Siem Reap</option>
58          </select>
59      </div>
60  </div>
61  <div>
62      <input type="submit" class="btn btn-primary btn-lg offset-3" value="Login" />
63  </div>
64  </form>
65
```

# 13. Practice Table

```
Table.cshtml  HorizontalForm.cshtml  InlineForm.cshtml  VerticalForm.cshtml  _Layout.cshtml
1
2  @{
3      ViewBag.Title = "Table";
4  }
5
6  <h2>Table</h2>
7
8  <table class="table table-striped table-hover">
9      <thead>
10         <tr>
11             <th>No.</th>
12             <th>Course Name</th>
13             <th>Duration</th>
14         </tr>
15     </thead>
16     <tbody>
17         <tr>
18             <td>1</td>
19             <td>Asp.net MVC 5</td>
20             <td>45h</td>
21         </tr>
22         <tr>
23             <td>2</td>
24             <td>Math Computing</td>
25             <td>45h</td>
26         </tr>
27         <tr>
28             <td>3</td>
29             <td>PHP&MySQL</td>
30             <td>45h</td>
31         </tr>
32     </tbody>
33 </table>
```

# Summary

- ✓ Bootstrap
- ✓ Grid System
- ✓ Responsive Design

THANK YOU
